[illegible]

1. RESISTOR Resistance is shown in ohm (K = 1,000, M = 1,000,000). All resistors are 1/8W and 5% tolerance carbon resistors unless otherwise noted as the following marks:
1W 2 Metal or Metal oxide 1/2 watt 1/2W 3 Solid of 1/2 watt
10W 4 Pulse resistor of 1 watt 10W 5 Constant of 10 watts
K = 510% \pm = 12% P = 1%

2. CAPACITOR Values are shown in schematic capacitor values less than 1 are expressed in μ F and the values more than 1 is pF.
All capacitors are ceramic 50V, unless otherwise noted as the following marks:
 $\frac{1}{2}$ Electrolytic capacitor $\frac{1}{2}$ Mica capacitor

3. The parts indicated with "A" have special characteristics must be received with identical parts only.
4. All schematic diagram is the latest the state of supply, so it not be thought in agreement with all informed indication notices.
